Profile

Master of Computer Science student at the University of Sydney specialising in Data Science, AI, and Software Engineering. Hands-on with Python, TypeScript, SQL, web applications, data validation, model evaluation, and clear technical communication; seeking a software engineering internship with strong testing and product quality ownership.

Education

Master of Computer Science (Advanced Entry)

University of Sydney

Specialisations: Data Science & AI, Software Engineering | Current WAM: 80

2025 - 2027

Sydney, Australia

PG Certificate in AI/ML & Data Science

Indian Institute of Technology Roorkee

Final Score: 85/100 | Machine Learning: 86 | Deep Learning: 84

2024 - 2025

Roorkee, India

Bachelor of Engineering in Biotechnology

M.S. Ramaiah Institute of Technology

First Class with Distinction | CGPA: 8.0/10

2019 - 2023

Bengaluru, India

Selected Projects

Medical Retrieval-Augmented Generation System

Self-directed

2026

Python, Streamlit, PyTorch, Hugging Face, scikit-learn

- Built a local RAG workflow covering document ingestion, chunking, indexing, evidence retrieval, grounded response generation, and evaluation.
- Designed comparative evaluation runs for TF-IDF, all-mpnet-base-v2, and Bio ClinicalBERT retrievers, tracking Precision@3 and Recall@3 to validate quality changes.
- Improved Precision@3 from 66.7% to 83.3% while maintaining 100% Recall@3, documenting results through a Streamlit interface.

Interactive Technical Portfolio

Self-directed

2026

Next.js, TypeScript, Tailwind CSS, Framer Motion

- Developed a responsive portfolio site with reusable React components, typed project data, navigation states, and polished mobile/desktop layouts.
- Validated visual behaviour across viewports, refined spacing and interaction issues, and shipped an improved public-facing technical profile.

Local project: [Ruby Portfolio](#)

Australian Rental Insight Copilot

Self-directed

2026

Python, Streamlit, pandas, Plotly, scikit-learn

- Built a data application for rental-market analysis with schema inference, automated exploratory analysis, visualisation, and anomaly detection.
- Checked merged listings and NSW rental bond data for consistency, outliers, and suburb-level trend reliability before surfacing insights in the dashboard.

Experience

Neuberg Anand Academy of Laboratory Medicine

Laboratory Intern

Aug 2022 - Sep 2022

Bengaluru, India

- Observed diagnostic workflows across departments in a reference laboratory, building attention to process quality, documentation, and operational accuracy.

Apex Biotechnology Training and Research Institute

Bioinformatics Intern

Nov 2021

Chennai, India

- Completed short-term training in computational analysis, biological data interpretation, and structured technical reporting.

Technical Skills

Languages

Python, TypeScript, JavaScript, SQL, R

Testing

Manual testing, regression checks, test case thinking, defect documentation, data validation

Frontend

React, Next.js, Tailwind CSS, Streamlit, Plotly

Data/ML

pandas, scikit-learn, PyTorch, TensorFlow/Keras, NLP, RAG, model evaluation

Tools

Git, GitHub, Docker, LaTeX, LangChain, GraphPad Prism

Achievements

- GATE 2025 - 92 percentile nationally in Data Science & AI.
- Kaggle Datasets Expert - global rank 520.
- Authored 10+ technical articles on Analytics Vidhya with multiple top-10 blogathon rankings.
- IELTS Band 8.0.
